

Senior Process Engineer 100% (w/m/d)

Biosimo AG is an ETH Zurich spin-off developing the technology to valorise bioethanol into higher-value chemicals. We are scaling up our operations by constructing a pilot plant to provide our customers with bio-based acetic acid. We are looking for a motivated senior process engineer to strengthen our team and drive the principal design of our pilot plant process.

Job description:

- Work within an international and multicultural team
- Build and develop a team of engineers
- Advise on process and reactor simulation projects
- Design and manage projects with multiple stakeholders
- Build and maintain relations with external partners and vendors
- Managing the pilot plant design and construction with contractors
- Establish a pilot plant operating model and budget plan
- Represent the company at events, conferences, and trade shows
- Take part in the strategy and decision-making for the commercialization
- Grow and develop to become a candidate for the COO role

Your profile:

- Excited to develop the next generation of sustainable chemical processes
- Highly committed and motivated to work in a dynamic early-stage startup
- Relevant studies and experiences in the field
- Willingness to move within Switzerland

What we offer:

- Opportunity to work in an impact start-up
- Develop personal and management skills
- Hybrid work model and flexible hours
- Basic Start-up salary with 20 standard + 10 days extra paid vacation
- Participation in employee stock option program

Framework:

- Work locations: ETH Zurich Hoenggerberg, Center, and Schlieren
- Permit: Swiss or EU Nationals, Swiss Permit (B or higher), or EU resident
- Start date: March-April 2023 or upon agreement
